Summary

I am an aspiring Mechatronics Engineer in my 3rd year of bachelor studies at the University of Southern Denmark. With some experience on the side as a Software Engineer, I position myself as an interdisciplinary specialist with a keen eye on aviation and user experience in digital systems in particular. In the past 2 years I spearheaded over 10 automation and UX improvement projects across fields such as avionics and redundancy system development and project management.

Education

BSc in Engineering (Mechatronics)

University of Southern Denmark

Sept 2024 – Jun 2027; GPA: 10,5

President of the *Als Rocketry Club*, Systems Administrator and Avionics Engineer. Managed 3 projects co-funded by external investors as well as the *European Space Agency*. Participated in the development of the braking system for the *Vikings Formula Student Team*.

Work Experience

Software Engineer

eCo Solutions ApS

Jul 2025 – Present

Lead 2 separate projects aimed at expanding Danish-German cross-border cooperation. Implemented initiatives that strengthened B2B discoverability in Southern Denmark. Supported the technological needs of the *Agrocura* investment fund by developing autonomous data and goods' tracking services.

Systems Engineer (Student Assistant)

Mads Clausen Institute,

University of Southern Denmark

Mar 2026 – Jun 2026

Worked on developing the internal Inventory System at the Mads Clausen Institute creating both technological solutions and developing processes for the functioning of the system: created an internal supply chain to track the inventorised items; created an NFC-based contactless UI for item tracking.

Software Engineer

LudusXR ApS

Nov 2024 – Jun 2025

Developed software solutions for lifelong learning and education of seasonal workers, provided support to 2 projects co-funded by the EU aimed at strengthening international cooperation through the Erasmus initiative.

Volunteering

Training Director, Educator

VATSIM Latvia vACC

May 2021 – Present

Created and provided educational material for people interested in learning about the Latvian airspace and procedures. Organised numerous events aimed at popularising the aviation industry in Latvia.

Event Coordinator

G.E.A.R. Inaugural Hackathon

Nov 2024

Assisted throughout the whole Hackathon organisation process, facilitated the provision of materials and equipment to participants, posed as an expert-assistant on-site and assistant chief coordinator.

Languages

Native: Russian, Latvian, English

Danish: B1, German: B1

Technical Skills

Linux System Administration, Relational SQL Databases, WebSockets, React, Next.js, Angular, Git, C/C++, C#, Python, CAD (Siemens NX, Fusion 360), Circuit Board Design, Systems and Processes Analysis, MS Office.
